

UNCOVER HISTORY FOR THE FUTURE

Who are the people behind historical events and landmark court cases? What's fact and what's the dominant narrative? How can we relate case studies to current events? When studying topics related to social justice, students are challenged to not just learn about singular events but analyze and interpret them as a whole.

Gale Case Studies gives academic instructors and undergraduate students a destination where they can dive deeper into social justice issues with primary source-centered case studies, discussion questions, and links to curated content. This well-rounded and thoughtfully created resource encourages students to spend quality time with the topics they're studying—in an online or virtual course—and become better problem solvers.
